The following items are applicable to this modification: CHANGES

3. SUBMISSION CRITERIA:

Technical proposals will be evaluated based upon the factors identified below.

3.1 General Contractor Relevant Experience:

The offeror will demonstrate an experience level with water tank and utility installation projects and must have completed at least five relevant projects that were at a minimum of \$1,000,000 or higher in value within the last five years with satisfactory results. Basic information required on these projects will include as a minimum the information provided on the form "Prime Contractor/Subcontractor Experience" at the end of section 00100.

In order to demonstrate relevant experience, the offeror shall provide information on a minimum of three and a maximum of five similar and relevant projects completed in the past five years that are similar in size, contract value, and complexity to the project in this solicitation. Projects with a similar scope to this solicitation concerning project value, concrete water tank construction, pumping station construction, and site and utility work shall be submitted. These projects should demonstrate that the offeror has successfully completed a minimum of two concrete water supply storage tanks with a capacity not less than 300,000 gallons. The offeror shall also demonstrate experience with pumping stations for fire suppression systems and with underground water supply lines including fire hydrant projects. The contractor shall include references and descriptions to include the following:

- (1) The location of the project;
- (2) The name of the project;
- (3) The contract number;
- (4) The dollar size of the project;
- (5) A point of contact or reference of the project. The point of reference may be
- authorized representative of the owner or the person responsible for contracting;
- (6) The date of physical completion;
- (7) Relevance to this project.

If applicable, indicate why the project exceeded original contract cost and/or schedule.

If the prime contractor is not concrete water-tank contractor, the prime contractor should provide the name of the subcontractor to be used in the execution of this work and show evidence that the contractor meets the above requirements. The offeror may use the experience of a subcontractor in lieu of the general contractor's experience

for the submitted projects. If the experience of a subcontractor is used, that specific subcontractor must be used on the project by the successful offeror. The offeror, however, must have experience in the coordination of work.

3.2 General Contractor Past Performance: Provide the performance ratings that demonstrate at least an acceptable or satisfactory performance for the relevant projects submitted in paragraph 3.1. If the experience of a subcontractor is used, provide performance ratings for the projects submitted.

Documentation by way of correspondence from previous project owners will suffice if performance-rating forms are not available. The Government may contact the individuals identified by the offeror to confirm performance capabilities. The Government will use other information that is readily available to determine an offeror's past performance, such as CCASS ratings or other Government rating systems of either Federal, State or Local jurisdictions. The offeror may use the Past Performance Questionnaire to document performance.

2. The following were in attendance at the site visit on March 16, 2004.
